Mercury Clearance from Human Plasma During Invitro Dialysis - Screening Systems for Chelating Agents. Ferguson CL; Cantilena LR *Journal of Toxicology - Clinical Toxicology*; 30 (3) p423-441 1992 (AN47)

Influence of 2,3 dimercaptopropane-1-sulfonate and dimercaptosuccinic acid on the mobilization of mercury from tissues of rats pretreated with mercuric chloride, phenylmercury acetate or mercury vapors Buchet JP & Lauwerys RR *Toxicol* 54 1989 323-33 (AP26)

meso-2,3-Dimercaptosuccinic Acid Monoalkyl Esters - Effects on Mercury Levels in Mice. Gale GR; Smith AB; Jones MM; Singh PK *Toxicology*; 81 (1) p49-56 1993 (AS12)

Toxicology of chelated mercury Friedman CG et al *J Environm Pathol Toxicol* 2 1979 1529-1537 (AS55)

Protective effects of 2,3-dimercaptopropane-1-sulfonate on mercuric chloride-induced acute inhibition of enzymes from rat duodenal mucosa and kidney cortex Suzuki S, Takamura S, Sugiki K, Imai M, Niwa O & Tamatani R *Toxicology* 86 1994 29-48 (AT55)

Mercury Kinetics in a Case of Severe Mercuric Chloride Poisoning Treated with Dimercapto-1-propane Sulphonate (DMPS). Toet AE; Vandijk A; Savelkoul TJF; Meulenbelt J *Human & Experimental Toxicology*; 13 (1) p11-16 JAN 1994 (AU3)

Evaluation of the Protective Activity of 2,3- Dimercaptopropanol and Sodium 2,3-Dimercaptopropane-1- Sulfonate on Methylmercury-Induced Developmental Toxicity in Mice. Gomez M; Sanchez DJ; Colomina MT; Domingo JL; Corbella J *Archives of Environmental Contamination and Toxicology*; 26 (1) p64-68 JAN 1994 (AU20)

Effect of Oral Therapy with Monoisoamyl Meso-2,3- Dimercaptosuccinate on Hg-203 Retention in Rats. Kostial K; Blanusa M; Piasek M; Jones MM; Singh PK *Bulletin of Environmental Contamination and Toxicology*; 52 (4) p492-497 APR 1994 (AU34)

Protective Effects of 2,3-Dimercaptopropane-1-Sulfonate on Mercuric Chloride-Induced Acute Inhibition of Enzymes from Rat Duodenal Mucosa and Kidney Cortex. Suzuki S; Takamura S; Sugiki K; Imai M; Niwa O; Tamatani R *Toxicology*; 86 (1-2) p29-48 JAN 26 1994 (AX21)

Clearance half life of mercury in urine after the cessation of long term occupational exposure: influence of a chelating agent (DMPS) on excretion of mercury in urine Sällsten G, Barregård L & Schutz A *Occupational and Environmental Medicine* 51 1994 337-342 (AX34)

Fluctuation of trace elements during methylmercury toxication and chelation therapy. Bapu C; Purohit RC; Sood PP *Human & Experimental Toxicology*; 13 (12) p815-823 DEC 1994 (BA30)

Evaluation of the antidotal effect of DL alpha-lipoic acid against mercuric chloride-induced acute renal dysfunction. Devi VK; Sumathi R; Varalakshmi P *Medical Science Research*; 22 (12) p859-862 DEC 1 1994 (BB10)

Monoisoamyl meso-2,3-dimercaptosuccinate as a delayed treatment for mercury removal in rats. Kostial K; Kargacin B; Blanusa M; Piasek M; Jones MM; Singh PK *Environmental Health Perspectives*; 102 p309-311 SEP 1994 (BD5)

Mobilization of heavy metals by newer, therapeutically useful chelating agents. Aposhian HV; Maiorino RM; Gonzalezramirez D; Zunigacharles M; Xu ZF; Hurlbut KM; Juncomunoz P; Dart RC; Aposhian MM *Toxicology*; 97 (1-3) p23-38 MAR 31 1995 (BD55)

Effects of sulfhydryl compounds on the accumulation, removal and cytotoxicity of inorganic mercury by primary cultures of rat renal cortical epithelial cells. Endo T; Sakata M *Pharmacology & Toxicology*; 76 (3) p190-195 MAR 1995 (BE9)

Dose-related efficiency of mono-n-hexyl meso-2,3-dimercaptosuccinate in decreasing ²⁰³Hg retention in rats Kostial K et al *Pharmacol Toxicol* 77 1995 79-80 (BE31)

Prolonged oral treatment with two monoesters of meso-2,3-dimercaptosuccinic acid for depleting inorganic mercury retention in suckling rats Kostial K, Blanusa M, Piasek M, Jones MM & Singh PK *Pharmacol Toxicol* 77 1995 216-218 (BF7)

Assessment of the protective activity of monoisoamyl meso-2,3-dimercaptosuccinate against methylmercury-induced maternal and embryo/fetal toxicity in mice Belles M, Sanchez DJ, Gomez M, Domingo JL, Jones MM & Singh PK *Toxicol* 106 1996 93-97 (BF64)

Evaluation of urinary mercury excretion after administration of 2,3-dimercapto-1-propane sulfonic acid to occupationally exposed men. Torresalanis O; Garzaocanas L; Pineyrolopez A *Journal of Toxicology - Clinical Toxicology*; 33 (6) p717-720 1995 (BG17)

Comparison of rac- and meso-2,3-dimercaptosuccinic acids for chelation of mercury and cadmium using chemical speciation models. Fang XJ; Hua FM; Fernando Q *Chemical Research in Toxicology*; 9 (1) p284-290 JAN-FEB 1996 (BH11)

The protective effect of DMPS against mercury toxicity in the isolated-perfused proximal tubule of the rabbit kidney Vincent IM, Barfuss DW, Zalups RK *Abstr. of the 35th Ann Meet of the Soc. of Toxicology*; *Fund Appl Toxicol* 30(1) 1996, abstr 1513 (BH67)

Influence of dietary levels of protein and sulfur amino acids on the fate of methylmercury in mice. Adachi T; Yasutake A; Hirayama K *Toxicology*; 93 (2-3) p225-234 NOV 11 1994 (BA32)

Ameliorative Capacities of Vitamins and Monothiols Administered Alone or in Combinations in Methylmercury Mobilisation in Nervous and Non-Nervous Tissues of Mice. Sood PP; Vijayalakshmi K; Bapu C *Cellular and Molecular Biology*; 39 (2) p213-219 1993 (BB48)

Inorganic mercury exposure, mercury-copper interaction, and DMPS treatment in rats. Blanusa M; Prester L; Radic S; Kargacin B *Environmental Health Perspectives*; 102 p305-307 SEP 1994 (BD4)

Protective effect of diethyldithiocarbamate on mercury-induced toxicity in kidney mitochondria. Reyesvivas H; Lopezmoreno F; Chavez E *Comparative Biochemistry and Physiology C - Pharmacology Toxicology & Endocrinology*; 113 (3) p349-352 MAR 1996 (BH61)

Increased inorganic mercury in spinal motor neurons following chelating agents. Ewan KBR; Pamphlett R *Neurotoxicology*; 17 (2) p343-349 SUM 1996 (BJ31)

Metal binding properties of a monoclonal antibody directed toward metal-chelate complexes. Blake DA; Chakrabarti P; Khosraviani M; Hatcher FM; Westhoff CM; Goebel P; Wylie DE; Blake RC *Journal of Biological Chemistry*; 271 (44) p27677-27685 NOV 1 1996 (BL39)

The spectrophotometry determination of chelate complex: L-ascorbic acid with 10d element (Cd(II), Zn(II), Hg(II) Kleszczewska E *Toxicol Lett suppl* 1 1996, Eurotox 96, P2H-222 (BL48)

Role of chelating agents for prevention, intervention, and treatment of exposures to toxic metals. Goyer RA; Cherian MG; Jones MM; Reigart JR *Environmental Health Perspectives*; 103 (11) p1048-1052 NOV 1995 (BX14)

The role of protonation and metal chelation preferences in defining the properties of mercury-binding coiled coils. Dieckmann GR; Mcrorie DK; Lear JD; Sharp KA; Degrado WF; Pecoraro VL *Journal of Molecular Biology*; 280 (5) p897-912 JUL 31 1998 (CA22)

Renal disposition of mercury (Hg) in normal and uninephrectomized (NPX) rats after treatment with 2,3-dimercapto-1-propane sulfonate (DMPS) or meso-2,3-dimercaptosuccinic acid (DMSA) Zalups RK *Abstr Exp Biol Meet, Anaheim 1994 FASEB J* 1994 (BN29)

Combined oral treatment with racemic and meso-2,3-dimercaptosuccinic acid for removal of mercury in rats Kostial K, Restek-Samarzija N, Blanusa M, Piasek M, Jones MM, Singh PK *Pharmacol Toxicol* 81 1997 242-244 (BT56)

Dose-related efficiency of mono-n-hexyl meso-2,3- dimercaptosuccinate in decreasing Hg-203 retention in rats. Kostial K; Blanusa M; Prester L; Jones MM; Singh PK *Pharmacology & Toxicology*; 77 (1) p79-80 JUL 1995 (BU39)

Treatment of mercury and lead poisonings with dimercaptosuccinic acid and sodium dimercaptopropanesulfonate - A review. Aaseth J; Jacobsen D; Andersen O; Wickstrom E *Analyst*; 120 (3) p853-854 MAR 1995 (BY9)

Sodium 2,3-dimercapto-1-propanesulfonate (DMPS) treatment does not redistribute lead or mercury to the brain of rats. Aposhian MM; Maiorino RM; Xu ZF; Aposhian HV *Toxicology*; 109 (1) p49-55 MAY 3 1996 (BJ52)

Sodium 2,3-dimercaptopropane-1-sulfonate challenge test for mercury in humans .3. Urinary mercury after exposure to mercurous chloride. Maiorino RM; Gonzalezramirez D; Zunigacharles M; Xu ZF; Hurlbut KM; Aposhian MM; Dart RC; Woods JS; Ostroskywegman P; Gonsebatt ME; Aposhian HV *Journal of Pharmacology and Experimental Therapeutics*; 277 (2) p938-944 MAY 1996 (BK15)

Biodistribution of radiomercury in rabbits and efficiency of dimercaptopropanesulfonic acid (DMPS) and dimercaprol (BAL) to reduce tracer-level kidney burden of radiomercury in rats Coveney JR, Robbins MS & Adams MD *Fed Proc* 45 1986 abstr 1666 (BP38)

Urinary mercury in twelve cases of cutaneous mercurous chloride (calomel) exposure: Effect of sodium 2,3- dimercaptopropane-1-sulfonate (DMPS) therapy. Garzaocanas L; Torresalanis O; Pineyrolopez A *Journal of Toxicology - Clinical Toxicology*; 35 (6) p653-655 1997 (BY22)

Mechanisms of action of 2,3-dimercaptopropane-1-sulfonate and the transport, disposition, and toxicity of inorganic mercury in isolated perfused segments of rabbit proximal tubules. Zalups RK;

Parks LD; Cannon VT; Barfuss DW *Molecular Pharmacology*; 54 (2) p353-363 AUG 1998 (CA30)

DMPS (2,3-dimercaptopropane-1-sulfonate, dimaval) decreases the body burden of mercury in humans exposed to mercurous chloride. Gonzalezramirez D; Zunigacharles M; Narrojuarez A; Molinarecio Y; Hurlbut KM; Dart RC; Aposhian HV *Journal of Pharmacology and Experimental Therapeutics*; 287 (1) p8-12 OCT 1998 (CB23)

Further Study of Effects of Chelating Agents on Excretion of Inorganic Mercury in Rats. Shimada H; Fukudome S; Kiyozumi M; Funakoshi T; Adachi T; Yasutake A; Kojima S *Toxicology*; 77 (1-2) p157-169 1993 (BX33)

Effectiveness of N-acetylcysteine in protecting against mercuric chloride-induced nephrotoxicity
Girardi G & Elias MM *Toxicol* 67 1991 155 (BZ10)
