Modulation of serotonin induced currents by metals in mouse neuroblastoma cells. Uki M; Narahashi T
Archives of Toxicology; 70 (10) p652-660 AUG 1996 (BJ28)

Changes of activity and ultrastructural localization of alkaline phosphatase in cerebral cortical microvessels of rat after single intraperitoneal administration of mercuric chloride. Albrecht J; Szumanska G; Gadamski R; Gajkowska B
Neurotoxicology; 15 (4) p897-902 WIN 1994 (BJ37)

Effects of inorganic mercury on (3H)dopamine release and calcium homeostasis in rat striatal synaptosomes Hare MF et al
Toxicol Appl Pharmacol 102 1990 316 (BJ42)

Changes in brain monoamine levels and monoamine oxidase activity in the catfish, *Clarias-Batrachus*, during chronic treatments with mercurials
Kirubakaran R & Joy KP Bull Env Cont Tox 45 1990 88 (BJ43)

Differences in frequency of finger tremor in otherwise asymptomatic mercury workers Chapman LJ et al
Br J Ind Med 47 1990 838 (BJ44)

Inhibition of calcium transport by mercury salts in rat cerebellum and cerebral cortex in vitro. Yallapragada PR; Rajanna S; Fail S; Rajanna B
Journal of Applied Toxicology; 16 (4) p325-330 JUL-AUG 1996 (BJ49)

In vitro and in vivo effects of lead, methyl mercury and mercury on inositol 1,4,5-trisphosphate and 1,3,4,5-tetrakisphosphate receptor bindings in rat brain. Chetty CS; Rajanna S; Hall E; Yallapragada PR; Rajanna B
Toxicology Letters; 87 (1) p11-17 SEP 1996 (BJ50)

Selective inhibition of glutamate uptake by mercury in cultured mouse astrocytes
Kim P & Choi BH *Yonsei Med J* 36 1995 299-305 (BJ53)

Choree fibrillaire de Morvan et polyradiculonevrite d'etiologie mercurielle probable
Garcin R, Boudene C, Ginsbourg M *Rev Neurologique* 125 1971 322-325 (BK1)

Etude anatomo-pathologique de deux cas de radiculo-nevrite, le premier survenu au cours d'une intoxication mercurielle aigue, le second d'origine infectieuse probable
Guillain G, Bertrand I *Rev Neurologique* 66 1936 519-532 (BK2)

Inhibition of regulatory volume decrease in swollen rat primary astrocyte cultures by methylmercury is due to increased amiloride-sensitive Na⁺ uptake.
Vitarella D; Kimelberg HK; Aschner M *Brain Research*; 732 (1-2) p169-178 SEP 2 1996 (BK29)

Feasibility and validity of three computer-assisted neurobehavioral tests in 7-year-old children.
Dahl R; White RF; Weihe P; Sorensen N; Letz R; Hudnell HK; Otto DA; Grandjean P *Neurotoxicology and Teratology*; 18 (4) p413-419 JUL-AUG 1996 (BK34)

Acute mercury intoxication examined with coordination ability and tremor.
Netterstrom B; Guldager B; Heeboll J *Neurotoxicology and Teratology*; 18 (4) p505-509 JUL-AUG 1996 (BK35)

Effects of thiol-reagents on (3H)alpha-amino-3-hydroxy-5-methylisoxazole-4-propionic acid binding to rat telencephalic membranes
Terramani T, Kessler M, Lynch G, Baudry M *Mol Pharmacol* 34 1988 117-123 (BK41)

Molecular mechanisms of metal toxicity in neuronal cells
Rossi A, Karolinska inst, Stockholm, 1996, Dissertation (BK42)

Methylmercury treatment enhances NMDA toxicity in rats' cerebellar granule neurons from offspring
Rossi AD et al, *manuscr* 1996 (BK44)

Prenatal exposure to methylmercury alters locomotor activity of male but not female rats
Rossi AD et al *Exp Brain Res* *subm* 1996 (BK45)

Mercury chloride modulation of the GABA(A) receptor-channel complex in rat dorsal root ganglion neurons.
Huang CS; Narahashi T *Toxicology and Applied Pharmacology*; 140 (2) p508-520 OCT 1996 (BK53)

Uptake of inorganic mercury by the human brain.
Pamphlett R; Waley P *Acta Neuropathologica*; 92 (5) p525-527 NOV 1996 (BK56)

The effects of methylmercury on endogenous dopamine efflux from mouse striatal slices
Kalisch BE & Racz WJ *Toxicol Lett* 89 1996 43-49 (BK57)

Effect of mercuric chloride intoxication and dimercaprol treatment on delta-aminolevulinatase from brain, liver and kidney of adult mice.
Emanuelli T; Rocha JBT; Pereira ME; Porciuncula LO; Morsch VM; Martins

AF; Souza DOG *Pharmacology & Toxicology*; 79 (3) p136-143 SEP 1996 (BL11)

Ultraviolet radiation, thiol reagents, and solubilization enhance AMPA receptor binding affinity via a common mechanism. Hall RA; Quan A; Kessler M; Lynch G *Neurochemical Research*; 21 (8) p963-968 AUG 1996 (BL12)

Purkinje cells express neuronal nitric oxide synthase after methylmercury administration. Himi T; Ikeda M; Sato I; Yuasa T; Murota S *Brain Research*; 718 (1-2) p189-192 APR 29 1996 (BL16)

Mercuric chloride uncouples glutamate uptake from the countertransport of hydroxyl equivalents. Nagaraja TN; Brookes N *American Journal of Physiology - Cell Physiology*; 40 (5) pC1487-C1493 NOV 1996 (BL38)

Metallothionein induction protects swollen rat primary astrocyte cultures from methylmercury-induced inhibition of regulatory volume decrease. Vitarella D; Conklin DR; Kimelberg HK; Aschner M *Brain Research*; 738 (2) p213-221 NOV 4 1996 (BL43)

Effects of Hg²⁺ and CH₃Hg⁺ on Ca²⁺ fluxes in rat brain microsomes. Freitas AJ; Rocha JBT; Wolosker H; Souza DOG *Brain Research*; 738 (2) p257-264 NOV 4 1996 (BL44)

Methylmercury efflux from brain capillary endothelial cells is modulated by intracellular glutathione but not ATP. Kerper LE; Mokrzan EM; Clarkson TW; Ballatori N *Toxicology and Applied Pharmacology*; 141 (2) p526-531 DEC 1996 (BM9)

Cell signalling alterations as end-point for in vitro neurotoxicity testing Rossi AD, Manzo L, Orrenius S *Toxicol Lett suppl* 1 1996, Eurotox 96, W4-67 (BL48)

Selectivity of the Ca binding site in synaptosome Ca channels. Inhibition by multivalent metal cations Nachsten DA *J Gen Physiol* 83 1984 941-967 (BM20)

Changes of actin cytoskeleton during swelling and regulatory volume decrease in cultured astrocytes. Moran J; Sabanero M; Meza I; Pasantesmorales H *American Journal of Physiology - Cell Physiology*; 40 (6) pC1901-C1907 DEC 1996 (BN33)

Brain mercury in neurodegenerative disorders. Fung YK; Meade AG; Rack EP; Blotcky AJ *Journal of Toxicology - Clinical Toxicology*; 35 (1) p49-54 1997 (BN49)

Sensitivity of the binding sites on glutamate transporters to neurotoxic agents. Killinger S; Li Y; Balcar VJ *Neuroreport*; 6 (9) p1290-1292 JUN 19 1995 (BN50)

Sublethal effect of mercury and lead on monoamine oxidase in different regions of the brain in three freshwater teleosts. Shaffi SA *Revista Espanola de*

Fisiologia; 51 (3) p125-128 SEP 1995 (BO15)

Mercuric chloride affects morphology and thymidine incorporation into DNA in astroglial cells in culture Ronnback L & Hansson E ATLA 19 1991 219 (BO40)

Mercury-stimulated histamine uptake and binding in cultured astroglial and cerebral endothelial cells. Huszti Z; Madarasz E; Schlett K; Joo F; Szabo A; Deli M Journal of Neuroscience Research; 48 (1) p71-81 APR 1 1997 (BP9)

Identification of a Metalloprotease from Alzheimer's Disease Brain Able to Degrade the beta-Amyloid Precursor Protein and Generate Amyloidogenic Fragments. Papastoitis G; Siman R; Scott R; Abraham CR Biochemistry; 33 (1) p192-199 JAN 11 1994 (BP13)
